Additional Comments: _________________________________________________________
________________________________________________________________

Using the same scale as above, please indicate how well the following program learning objectives were met:

- List key issues in geriatric pharmacotherapy
  □          □          □          □
- Explain the effect of age on pharmacokinetics and pharmacodynamics
  □          □          □          □
- Discuss risk factors for adverse medication events and ways to mitigate them
  □          □          □          □
- Discuss the principles of medication prescribing for older patients
  □          □          □          □

Did you feel there were any aspects of commercialism? No □ Yes □
If yes, please elaborate (check all that apply):
  □ Unbalanced view of therapeutic options
  □ Failure to use generic names
  □ Use of single brand name versus several brand names
  □ Illustrative material reflected company product promotion
  □ Failure to disclose that product recommended for off-label use or still investigational
  □ Other (please specify):________________________________________________________
Which aspect of the lecture did you feel was most significant to your needs and why:

Will you make any changes in your practice as a result of the information from this seminar?  Yes □ No □

If yes, please explain (check all that apply):
☐ Alter my practice performance
☐ Won’t alter my performance, but convinced me I’m doing the right thing
☐ Is relevant to my practice
☐ Will result in better patient outcomes
☐ Other (please specify): ________________________________________________________
______________________________________________________________________________

The content covered will improve my following competencies (check all that apply):
☐ Patient care
☐ Medical knowledge
☐ Practice-based learning and improvement
☐ Interpersonal skills
☐ Professionalism
☐ Systems-based practice
☐ Other _____________________________________________________________________

How helpful were the active learning components (case-studies, participant discussion, etc.) in achieving the seminar’s objectives?  Low  Average  High

How would you rate your knowledge level of the subject matter discussed prior to the presentation(s)

How would you rate your knowledge level of the subject matter discussed following the presentation(s)

What future topics would you like to see offered in the areas of Pharmacokinetics or Pharmacodynamics? Other areas?

Thank you for your input.
